

A Modern Classic

Game Boy Advance SP

The Game Boy Advance SP was released in 2003. It is a modern classic to me because it is an item from my childhood which wasn't that long ago, but also far away in my memories.

Used Game Boy Advance SP: \$35.99

The Game Boy Advance SP comes in many colors. The one I have comes in a rose gold color. Here I have listed only six colors, but you can get many others. There are original colors and there are bodies being sold by users in different colors that you can find online.

This is a drawing of Sailor Mars from the anime Sailor Moon. Fashion is something that is admired by the audience of the show, so I decided to draw Mars in some "modern" cute clothes.

Drawing of the character Mercy from my favorite game Overwatch. She in an angelic healer and so I tried to show this through posing and the atmosphere I created around her.

Fan Art By Hannah Keller

In this section I have four different pieces that all come from all different sections of the nerd world I am a part of. I find drawing my favorite characters relaxing and exciting.

Watercolor and marker piece of Jessica Jones from the Marvel and Netflix show Jessica Jones. This piece is inspired from the first season and the purple theme that was used that season.

Jessica Jones Original Piece \$40.00

Black Cat from the Marvel Comics. It is inspired by the fact that she plays with Spider-Man's heart and I wanted to capture that.

I have a tendency to be laughing all the time. It usually means I'm happy or having fun, but it also can mean that I'm just uncomfortable or I don't know how to respond. I am selling you my nervous giggle today because I don't want it. I hate that I giggle in all of the wrong situations. It also can

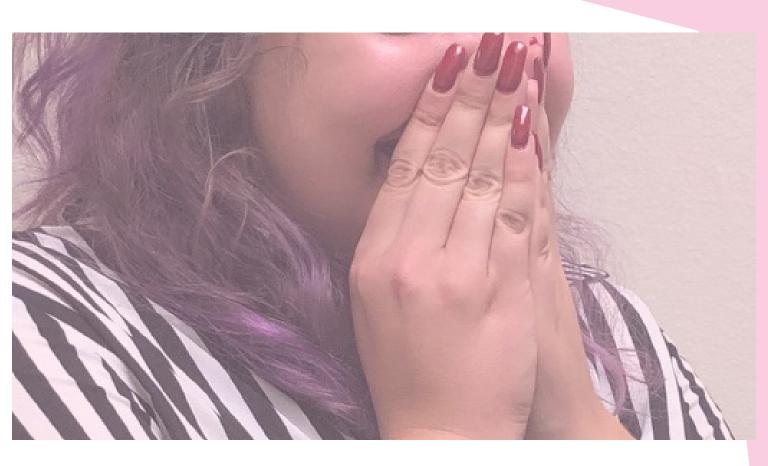

get annoying to people, so please take it!!!!
